

AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application:

Claim 1 (previously presented): Material (1) made up of at least a first (2) and a second (3) sheet each having two opposite faces (21, 22, 31, 32) designated as front (21, 31) and back (22, 32) faces, at least one (21, 31) of these faces being intended to bear legible printed information (4),

this material being characterised in that, in addition to the printed information (4), at least one of said front faces (21, 31) bears legible information (5) which, distinct from the printed information (4), is made up in the form of reliefs (51) which appear to be superimposed on the legible printed information (4) without changing the legibility of the printed information.

Claim 2 (original): Material according to claim 1, characterised in that the information in relief (5) is formed by local deformation along the thickness of at least one of the first and second sheets (2, 3).

Claim 3 (original): Material according to claim 1, characterised in that the information in relief (5) is formed by deposit of an element in relief (52) on at least one of said front faces (21, 31) of at least one of said first and second sheets (2, 3).

Claim 4 (original): Material according to claim 1, characterised in that the information in relief (5) is composed by local modification of the state of the surface of at least one of said front faces (21, 31) of at least one of said first and second sheets (2, 3).

Claim 5 (previously presented): Material according to claim 4, characterised in that the material (1) includes a single sheet (2) constituted by one (2) of said first and second sheets (2, 3), and the printed information (4) as well as the information in relief (5) are borne by this sheet (2).

Claim 6 (previously presented): Material according to claim 4, characterised in that it includes at least two sheets (2, 3) constituted by said first and second sheets (2, 3), of which:

- said first sheet (2) is made up of opaque material and whose said front face (21) bears the printed information (4),
- said second sheet (3) is made up of transparent material, and
 - on the one hand, at least whose said front face (31) bears the information in relief (5), and
 - on the other hand, is superimposed on the front face (21) of the first sheet (2) that bears the printed information (4).

Claim 7 (previously presented): Material according to claim 4, characterised in that it includes at least two sheets (2, 3) constituted by said first and second sheets (2, 3), of which:

- said second sheet (3) is made up of opaque material and whose said front face (31) bears the information in relief (5),
- said first sheet (2) is made up of transparent and flexible material and
 - bears the printed information (4) at least on its front face (21), and
 - is superimposed on the front face (31) of said second sheet (3) which bears the information in relief (5).

Claim 8 (previously presented): Material according to claim 4, characterised in that it comprises at least two sheets (2, 3) constituted by said first and second sheets (2, 3), of which:

- said second sheet (3) is made up of opaque material and whose said front face (31) bears the information in relief (5),

- said first sheet (2) is made up of opaque and flexible material, and
 - bears the printed information (4) at least on its front face (21), and
 - is closely superimposed on the front face (31) of said second sheet (3) which bears the information in relief (5).

Claim 9 (previously presented): Packaging comprising a receptacle, characterised in that this receptacle is made up at least in part of a material according to claim 8.

Claim 10 (previously presented): Inner lining for a receptacle, characterised in that it is made up at least in part of a material according to claim 8.

Claim 11 (previously presented): Outer wrapping for a receptacle characterised in that this outer wrapping is made up at least in part of a material according to claim 8.
